

About Me

My Work

Hello There!! I am Ankhi, and I enjoy writing efficient and meaningful codes.

Somewhere along the line, I went on to explore the marketing part of the IT industry---
as I didn't get much exposure to witnessing the impact of my coding efforts in real life.

Along the way, I have gone above and beyond my current role to assist my team with
UI development and enhancements.

Not only that, I leverage my marketing skills with coding knowledge to explain complex
programming concepts to people online through my blogs as a token of appreciation :)

All this experience has made me better and more knowledgeable than ever, and now I
am looking forward to helping companies with developing software.

My interest lies in solving complex business problems in both front-end (HTML, CSS, React JS) and back-end (MongoDB, API development, and SQL) aspects.

* Below are a couple of my projects:
